

DIYA S D

Python Full Stack Developer | Django | React.js | MySQL
diyasdinesh2003@gmail.com | +91-8089872960 | linkedin.com/in/diyasd | github.com/diy463

PROFESSIONAL SUMMARY

- B.Tech graduate in Electronics and Communication Engineering, currently working as a Python Full Stack Developer Intern with experience across the full SDLC — from planning and development to testing and deployment.
- Proficient in **Python, Django, JavaScript, React, HTML, CSS, and Bootstrap**, with hands-on experience building dynamic, responsive, and database-driven web applications.
- Experienced in designing and consuming **REST APIs** and writing complex **SQL queries** for data manipulation and database optimization in **MySQL**.
- Actively leverages AI tools (Chat GPT, Claude, Gemini) to accelerate development, automate repetitive tasks, and cutting time by up to 40%.

EXPERIENCE

Python Full Stack Developer Intern — Techolas Technologies 2025 – 2026 *Web Application Development*

- Built responsive, database-driven web applications using Django, MySQL, HTML, CSS, Bootstrap, and JavaScript, focusing on clean architecture and scalable backend design.
- Developed and integrated REST APIs with full CRUD operations, enabling real-time data flow between frontend and backend across multiple live application modules.
- Implemented JWT-based user authentication and role-based access control, ensuring secure and production-ready web application delivery.
- Collaborated in an agile team environment — participated in code reviews, sprint planning, and peer debugging sessions, reducing feature rework and improving delivery speed.

PROJECTS

Social Media Dashboard [GitHub] 2025 *Django | Python | SQLite | HTML | CSS | Bootstrap*

- Architected and deployed a full-stack social platform with secure authentication, role-based access, and personalised user profile management.
- Engineered an interactive content feed supporting image/video posts, captions, likes, comments, story uploads, and saved collections alongside a suggested-users discovery module that increased simulated user engagement by 35% in testing.
- Built a real-time follow/unfollow system with live follower counts, a date-indexed private diary with secure image uploads, and a chat module with message timestamps and clear-chat options.

Multitasking Agricultural Robot 2024 *ESP32 | Arduino IDE | C++*

- Designed and programmed a Bluetooth-controlled robot automating 4 field operations (ploughing, seeding, watering, fertilisation) using an ESP32 microcontroller, DC/servo motors, and ultrasonic sensors — reducing manual task time by an estimated 60%.
- Implemented dual-mode operation (automatic and manual), real-time obstacle detection, and resource-optimised motor scheduling — demonstrating embedded systems and hardware-software integration skills.

KEY HIGHLIGHTS

- Independent full-stack delivery:** designed DB schema, built REST APIs, and shipped a production-usable social platform with 10+ features — solo, during internship.
- Zero rework on all deliverables:** consistently delivered clean, self-documented code that passed review without revision cycles across every project module.
- Dual-domain engineering profile:** B.Tech in ECE plus full-stack development skills — combining hardware systems knowledge with modern web application development.
- AI-augmented developer:** integrated ChatGPT, Claude, and Gemini into daily workflows, accelerating debugging, documentation, and code generation.

TECHNICAL SKILLS

Languages: Python, JavaScript

Frontend: HTML5, CSS3, Bootstrap 5, React.js

Backend: Django, Django REST Framework

Database: MySQL, SQLite — schema design, CRUD operations, query optimisation

Concepts: REST APIs, JWT Authentication, Role-Based Access Control, OOP, MVC Architecture

Version Control: Git, GitHub

Tools: VS Code, Postman

AI Tools: ChatGPT, Claude, Gemini, Antigravity, Prompt Engineering

Skills: Team Collaboration, Effective Communication, Fast Learner, Detail-oriented, Problem-solving

EDUCATION

B.Tech in Electronics and Communication Engineering — College of Engineering Thalassery, Kerala

2021 – 2025
